SUMMARY

Data Science graduate with hands-on experience in Data Analytics, AI, Power BI, SQL, and Python. Skilled in building dashboards, analyzing datasets, and automating processes to support data-driven decision-making. Strong problem-solving mindset with practical exposure to AI, business operations and reporting. Seeking a Data Analyst / Business Intelligence related role to deliver actionable insights and measurable business impact.

PROFESSIONAL EXPERIENCE

Operations & Data Intern

Karachi United

(Dec 2025 – Feb 2026)

- Supported operations for a multi-city event with 800+ participants and 40 teams.
- Managed operations and logistics, including venue coordination, match scheduling, and on-ground execution.
- Streamlined workflow management for registrations and participant data using Excel ensuring efficiency.
- Assisted coordination with partners including Unilever, Jubilee Life, and myco.

IT Intern

Gerry's International (GSA)

(July 2025 – Aug 2025)

- Provided ERP and IT support using Odoo systems.
- Developed a Python automation script to match sales invoices and flag discrepancies.
- Reduced manual verification time and improved data accuracy.

Assistant Manager

Asian Corporation

(June 2023 – July 2024)

- Managed internal reporting and operational workflows.
- Improved financial data tracking and cross-department coordination.

General Secretary

Vanquishers, IoBM Sports Society

(Aug 2025 – July 2026)

- Led end-to-end planning and analytics for campus events, optimizing resource allocation and increasing event participation.

EDUCATION

Bachelor of Science in Data Science — Institute of Business Management | Expected June 2026 | **CGPA:** 3.45/4.0
A-Levels — Highbrow College (2022) | High Achiever Award O-Levels — Beaconhouse School System

KEY COMPETENCIES & TECHNICAL SKILLS

- | | |
|---|--|
| • Data Analytics & BI: Power BI, Data Visualization, Dashboarding, Excel (Pivot Tables, Reporting), KPIs | • Databases: SQL, MySQL |
| • Programming: Python, Java, C++ | • Core Skills: Data Cleaning, Data Analysis, Reporting, Automation, Business Insights, Prompt Engineering |

PROJECTS

- **Netflix / HR / Marketing Analytics Dashboards — Power BI:** Multiple dashboards analyzing viewership, attrition, and campaign ROI.
- **Custom Invoice & Ledger Manager — Full Stack (Node.js, MySQL, PWA):** Built a mobile-first invoicing system for a chemical supplier handling 30+ daily estimates, replacing manual processes with auto-pricing, PDF bills, and a full accounts ledger. Architected end-to-end and deployed on Railway.
- **Sales-Invoice Matcher Automation — Python:** Folder-watching script that matches invoices to sales and flags discrepancies.
- **AI-Based Dental Disease Classification (FYP) — Python, Deep Learning:** Developing a deep learning model to classify dental conditions from X-ray images using image processing and RCNN-based techniques.
- **Business Insights Database — MySQL:** Designed relational database schema and executed complex queries for reporting.

CERTIFICATIONS & AWARDS

- High Achiever Award – Highbrow College (2022)
- Eminent Phoenix Award – Highbrow College (2021)

EXTRACURRICULAR & LEADERSHIP

- Events Director – Vanquishers Sports Society
- Captain – College Football Team
- Captain – University Football Team
